EXHIBIT 44 (Filed Under Seal)

Sales info on Kill/Cut:

Up through w/e: 11.15.08, Sales files (to Agri) were SL only. Sent weekly.

Effective with w/e: 11.22.08, weekly Sales files (to Agri) were division (including Perry).

Effective with w/e: 7.4.09, weekly sales files to Agri were enhanced to include: SL (separate); Logan (Separate); and division (now without Perry)

Per Greg Dess, the SL kill/cut studies UTILIZE the prices in the Sales data minor...therefore, Part of Nov '08 THROUGH June '09 SL Kill/Cut had divisional sales for revenue calc.

Also, even though SL sales were available (in sales data minor) effective for July kill/cut, Agri failed to use...and instead, continued to apply division.

Sept' -09 SL Kill/cut will contain SL 'only' Sales prices...

Revenue Action items to improve the Tyson position in Agristats to the West

		Reve	enue Action items to improve the Tyson position in Agristats to the West
Location	Primal	Group responsible	Area of Opportunity
1.) Waterloo	Ham converting	Operations	Increase ham converting volume by 'x' pounds/shift/week @margin of 'x' Shane/Jason: Will this truly add inc margin or will we reduce what we send to QPI and just save frt?????
2.) Perry	Skinless belly	Belly sales	Continued review of templated belly customers to obtain pricing to offset the flank fold removal.
		International Sales	Need to 'change' the Nippon contract language to allow add'l SRB sales into Japan - if successful, the Logansport SRB production c/b moved to Perry and remedy some more of the flank fold issue
		International Sales	Add'l - changing contract language (as noted above) would allow the <u>'export pkg'</u> to be sold out of Perry: SRB, chilled loin, tenderloin, CT butt
3.) Logansport	Skinless belly	Operations	Working on design to 'split' the skinless line to accommodate efficient natural fall' production (rather than forced) of the various skinless types.
		Debbie	Debbie to calculate the Logansport belly primal return for Q2 and post.
4.) Perry	CT butts - Nippon	International Sales	Need to negotiate forumla price change on CT butts (Nippon) to include the # of downgraded CT's that must be sold domestic. This volume is currenlty approx 2 loads/week (downgraded due to color/wt/firmness)
		Trim Sales	Need new market for the blade meat (from CT butt). 20 loads/month were shipping to Fremont for GSP sku that was labelled as such. Re-visit bone in option for this portion.
		Retail sales	Need to find better mix for remaining Perry butts; All are category "B", this is detriment.
5.) Tyson	Bnls butts	Retail sales	Conf call to target the large metro market (NY/Chicago/LA) where high volumes of bnls butts are absorbed. We are currently not in this market. Yield test (bone wt vs bnls butt wt) to determine/validate our pricing yield.
		Retail sales	Tyson division is approx 20% bnls butt mix; West is 35%. Tyson has approximate price disadvantage (SL to West) of \$2.00/cwt bnls butt
6.) Tyson	CT butts (export)	International Sales	Need to increase CT butt mix; West mix of CT's is approx 7%; Tyson, without Perry, is less than 1%; Finished margin is approx \$25-\$30/cwt finished.
7.) Tyson	Offal	Operations	Review the drop disparities (controllable) to resolve the disparity to Storm Lake
8.) Tyson	Offal	Offal Sales	Review the drop disparities 'due to products not produced' to resolve the disparity to Storm Lake
9.) Tyson	Hogcost	Procurement	Disparity in hogcost: Q2 - agri only- SL is 4th best (of 11). Madison and Louisa are higher than SL.
10.) Storm Lake	Loins	Retail sales	Light loin (BI) mix is comparable to West at 11+%; SL has price disadvantage of \$1.38/cwt loin wt.
11.) Storm Lake	Tenderloins	Retail sales	SL tender yield is slightly higher than West (4.99 vs 4.42); Pricing is disadvantaged by \$13.97/cwt tender
12.) Storm Lake	Riblets	Retail sales	Riblet yld/price is disadvantaged to the West by \$.06/cwt 'carcass wt' (\$.36 * 80% * 22%) (pg 155)
13.) Storm Lake	Injected bnls loins	Retail sales	Inj mix is 10%; Top 3 locations are 18%, 27.6%, 34.2%. SL/West inj prices exceed dom * 110%. Thus, to pump more is economically favorable. (Business model is pump % covers added cost; \$'s above are margin)
14.) Storm Lake	Injected backribs	Retail sales	SL has none; West has 1%; East has 24%. Injected price is 130% of non injected (West). East appears to be 'just' Tarheel and their injected price 231.15 was lower than non- inj \$236.66
15.) Storm Lake	Bnls butts	Retail sales	SL bnls price was \$95.93 vs West of \$98.12. SL bnls butt mix is 31% of total; West is also 31% with more CT's
16.) Storm Lake	Ribs	Retail sales	Favorable on light and heavy pricing; Lack of other convert (+\$13.74/cwt to lights); and lack of speciality(+\$13.75 to lights)
